

Securing device or theft deterrent device? Both!

The Air Brake Plunger Securing Device made by Absolute Brake is a lockout/tagout securing device that prevents accidental release of the emergency parking brake on vehicles equipped with air brakes. The device is made of gold anodized aluminum and is easily installed by swiveling it between the base of the air brake controller valve and the plunger knob.

As an added feature, it comes equipped with a Master Lock that transforms it into a theft deterrent device as well. To learn more about the device or for information about where to purchase, visit AbsoluteBrake.com or call 805-371-8825. Circle No. **272** on Response Card
